

As of 31/08/2020

Investment Objective

The objective of the portfolio is to achieve higher long-term capital growth.

Investment Concept

The portfolio is composed of a bond ETF (approximately 40%) and equity ETFs (approximately 60%). The weightings of the equity ETFs within the portfolio follow the idea of roughly reflecting the share of the individual regional markets in the global equity market at the time of issue. These weightings are restored in a quarterly rebalancing. There is no discretionary management done for this portfolio.

Investment Horizon

The portfolio is primarily targeted at growth-oriented investors who have an investment horizon of at least five years.

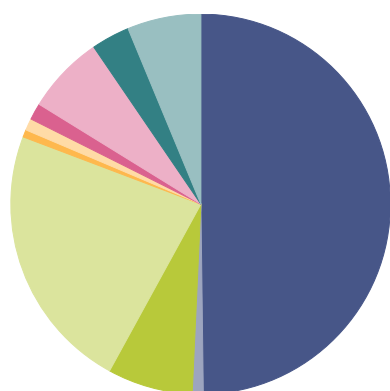

Risk Profile

The portfolio is of higher risk, especially in comparison to a portfolio predominantly composed of bond ETFs. In addition to the typical risks associated with the ETFs or assets held in the portfolio (such as credit risks, interest rate risks), this portfolio has an exchange rate risk due to the different reference currencies of the ETFs contained within it as well as the diversification of the assets of these ETFs.

Portfolio Details

Name of the Portfolio	MOVEasy Balanced EUR

• Japan	6.7
• Asia dev	3.3
• Asia emrg	6.3

Benchmark-Performance

Time Period: 01/09/2017 to 31/08/2020

Performance summary

Benchmark: The benchmark is a Composite Benchmark composed of market indices the Vanguard ETFs aim to replicate. The weighting of the equity incides is equal to the weighting of the respective equity ETFs within the portfolio and approximate the weighted equity proportion of each individual regional market of global equity markets, measured by market capitalization. The bond side is covered by the bond index the Vanguard ETFs aims to replicate. It is weighted with the respective weighting of the bond side within the portfolio. The development of the portfolio can be expected to be approximately equal to the development of the Composite Benchmark less costs. Furthermore, the Vanguard ETFs may not at all times be able to entirely track the performance of the indices they are referring to.

This portfolio was launched on 01 April 2020.
Performance data for this portfolio will be available after one year.

Past performance is no guarantee of future results. The value of investments is subject to price fluctuations. Subscription fees and brokerage fees are not included. Results based on BVI method (prior to costs of purchase) in USD.
