Investment Objective

The objective of the portfolio is to achieve very high long-term capital growth.

Investment Concept

This ETF/index fund portfolio consists of ETF and/or index funds with the investment classes equities (up to 100%) denominated in Euro, US Dollar or other currencies. In addition, this portfolio may contain up to a weighting of approximately 15% funds that are not ETFs or index funds, such as mixed funds, funds invested in alternative strategies and other funds.

Investment Horizon

The portfolio is primarily targeted at speculative investors who have an investment horizon of at least five years.

Risk Profile

The portfolio is very high risk. In addition to the typical risks associated with the ETFs or assets held in the portfolio (such as interest rate risks), this portfolio has an exchange rate risk due to the different reference currencies of the ETFs contained within it as well as the diversification of the assets of these ETFs.

Portfolio structure according to asset classes

	%
• Stock	87.0
• Bond	0.0
• Cash	5.0
• Other	8.0
Total	100.0

* If the distribution agreement does not offer this option, the minimum subscription fee agreed between the fund or its management company and Moventum S.C.A. is applicable and is charged to the account.

This portfolio was launched on 1 April 2020.
Performance data for this portfolio will be available
after the expiry of 12 months.

Past performance is no guarantee of future results. The value of investments is subject to price fluctuations. Subscription fees and brokerage fees are not included. Results based on BVI method (prior to costs of purchase) in USD.

Advantages of MOVEactive ETF asset management

High-quality investment approach

Investment process – clearly structured, successful investment process without "soft" factors, and without single-person risk due to an established team approach.

Reallocation – quarterly adjustment of the portfolio structure to current market situation based upon the expertise of an independent investment committee of experts and Moventum Asset Management.

Fund Selection Process – product and vendor-neutral, fund selection process for the allocation of the various asset classes.

Rebalancing – automatic, quarterly rebalancing of the Moventum portfolios to match the original risk-reward profile of the portfolio.

High transparency level of your capital investment

MoventumAccountView – via online account query, details of the current situation and performance of your investment is always available.

Moventum Portfolio Report – this quarterly report provides detailed information about your investment from the portfolio management team.

This brochure is intended for information purposes only and does not constitute a recommendation for investment. The content is based on information sources which are considered reliable.
