### **Investment Strategy**

**Investment Growth** 

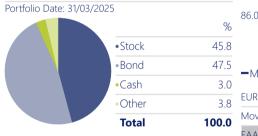

The investment objective is to generate higher and long-term capital growth. Investments are made primarily in equity funds denominated in euro and other currencies (approximately 50% of the assets) and in bond funds (approximately 50% of the assets). The investments are diversified worldwide. The portfolio is primarily aimed at growth-oriented investors who should have an investment horizon of at least five years. The portfolio has a higher risk compared to a portfolio consisting mainly of bond funds. In addition to the typical risks of the funds contained in the portfolio (such as creditworthiness risks, price risks, interest rate risks), this portfolio also has an exchange rate risk due to the different reference currencies of the funds contained in the portfolio and due to the diversification of the assets of these funds.

| Fiscal Year-End Month              | September     |

# Manager Comment

Investors experienced a disappointing Portfolio Date: 31/03/2025 month of March on the international capital markets. The stock markets were almost all weaker, although there were special movements in some sectors. In the US, Donald Trump is spreading further uncertainty and is throwing tariffs around. No one has yet been able to explain to him that he is also risking a recession in the USA. His congenial friend Elon Musk is also up to mischief: Many of the more than two million employees of the US federal authorities fear for their jobs. As a result, consumer confidence, which is so important as an indicator for the US economy, is dwindling. In Germany, the future government is trying to breathe new life into the ailing German economy and infrastructure with a huge infrastructure Fund Allocation programme stretched over the next twelve years. The other side of the coir will be a significant increase in debt due to the high defence spending. The bonc markets responded to this with a significant rise in yields. As Moventum strategies are still quite defensive particularly on the bond side, the consequences were only felt to a lesse extent. On the equity side, however, the absolutely high weighting of US equities with the accompanying surprising weakness of the US dollar had a negative impact. Nevertheless, we remain convinced by the US equity market. It is home to some of the largest growth companies, whose profits are rising faster than in most other regions.
