Redemption Plans	After making the minimum investment, from EUR 50.00 per month by standing order from the cash account..

### Portfolio Structure

Portfolio Holding Date: 31/03/2025

### Investment Strategy

The investment objective is to generate a very high, long-term increase in value. Investments are made predominantly in equity funds denominated in euros and other currencies (approximately 100% of the investment assets). The diversification of investments is worldwide. The portfolio does not contain any bond funds. The portfolio is primarily aimed at risk-oriented investors who should have an investment horizon of at least five years. The portfolio has a very high risk. In addition to the typical risks of the equity funds contained in the portfolio or the assets held by them (such as price risks, interest rate risks, etc.), this portfolio also has an exchange rate risk due to the different reference currencies of the funds contained in the portfolio as well as the diversification of the assets of these funds.

### Performance since Inception

Time Period: 01/01/2015 to 31/03/2025

— Moventum Global Growth USD

### Sustainability Information

EUR Return p.a. (in percent)	1 Year	3 Years	5 Years	Since Inception
Moventum Global Growth USD	1,18	5,23	10,88	8,36

## Manager Comment

Investors experienced a disappointing month of March on the international capital markets. The stock markets were almost all weaker, although there were special movements in some sectors. In the US, Donald Trump is spreading further uncertainty and is throwing tariffs around. No one has yet been able to explain to him that he is also risking a recession in the USA. His congenial friend Elon Musk is also up to mischief: Many of the more than two million employees of the US federal authorities fear for their jobs. As a result, consumer confidence, which is so important as an indicator for the US economy, is dwindling. In Germany, the future government is trying to breathe new life into the ailing German economy and infrastructure with a huge infrastructure programme stretched over the next twelve years. The other side of the coin will be a significant increase in debt due to the high defence spending. The bond markets responded to this with a significant rise in yields. As Moventum strategies are still quite defensive, particularly on the bond side, the consequences were only felt to a lesser extent. On the equity side, however, the absolutely high weighting of US equities with the accompanying surprising weakness of the US dollar had a negative impact. Nevertheless, we remain convinced by the US equity market. It is home to some of the largest growth companies, whose profits are rising faster than in most other regions.
